

## Case Study

Sector: Financial Services  
Client Requirement: 2 x Business Project Managers  
Basis: 2 x Permanent Role

### The Situation

The client global organisation with assets worth £70billion and a financial services division. Due to a number of projects in the pipeline they needed to recruit 2 Business Project Managers. The ideal candidates would have comprehensive experience gained in a financial transaction environment (within the financial services sector) and a proven track record in executing high-impact cross functional deliverables with a good understanding of IT processes.

Wellingtone were added to the PSL to provide recruitment services.

### The Wellingtone Process

Understand > Source > Assess > Introduce

The initial step was to understand the exact requirements to ensure we only sent candidates that we were confident the client would want to interview. So we discussed in -depth the responsibilities of the role and the attributes required by the successful candidate should possess.

The discussion allowed us to proceed with a clear understanding through which we were able to source / shortlist candidates from within our own internal database and create targeted adverts to be placed at:

- Wellingtone.co.uk: which has a traffic ranking in the top 7.72% of all websites (Alexa) and receives generally high search engine ranking
- Partner sites: jobs displayed on wellingtone.co.uk are automatically listed on a network of other prominent Project Management websites
- External Job Boards: we have full access to the UK's leading job boards

The shortlisted candidates completed a two step assessment process. This consisted of a high level evaluation against the role requirements and then a detailed technical interview with one of the Senior level Wellingtone Project Management Consultants. These steps enabled us to assess the candidates' project management competencies against the role requirements. The results were used to create the final candidate shortlist for submission.

### The Outcome

We introduced 4 high calibre Business Project Managers to the client, all were interviewed and 1 was successfully placed on a permanent basis.

The successful candidate had gained experience previously within the financial services sector and had delivered both business and IT projects.

Quotes

"Wellingtone provided 4 CVs which fitted our requirements well and we made an offer to one of these candidates"

HR Manager

A Software Localisation Company
