

Case Study

Sector: Public / Government Agency
Client Requirement: Business Project Manager (PRINCE2)
Basis: 2 x Contract Roles

The Situation

The client is a prominent Government agency and as part of regulation / legislation change they required 2 x contract project managers to develop business cases, scopes and then ultimately to manage the resulting projects. Their ideal candidates would be PRINCE2 Practitioners with extensive experience in producing fully costed business cases / project scoping documents and managing for end to end lifecycle projects .

Wellingtone were selected with a number of other recruitment agencies (including other project management specialists) to help source for these requirements.

The Wellingtone Process

Understand > Source > Assess > Introduce

The initial step was to understand the exact requirements to ensure we only sent candidates that we were confident the client would want to interview. So we discussed in -depth the responsibilities of the role and the attributes required by the successful candidate should possess.

The discussion allowed us to proceed with a clear understanding through which we were able to source / shortlist candidates from within our own internal database and create targeted adverts to be placed at:

- Wellingtone.co.uk: which has a traffic ranking in the top 7.72% of all websites (Alexa) and receives generally high search engine ranking
- Partner sites: jobs displayed on wellingtone.co.uk are automatically listed on a network of other prominent Project Management websites
- External Job Boards: we have full access to the UK's leading job boards
- Project Manager Today: we have an exclusive partnership and can provide free colour co -branded adverts, saving you £1750

The shortlisted candidates completed a two step assessment process. This consisted of a high level evaluation against the role requirements and then a detailed technical interview with one of the Senior level Wellingtone Project Management Consultants. This enabled us to assess the candidates' project management competencies against the role requirements. The results were used to create the final candidate shortlist for submission.

The Outcome

We introduced 5 high calibre candidates to the client and 2 were successfully placed on an on-going contract basis.

The successful candidates both had wide ranging project management experience in private and public organisations and were PRINCE2 Practitioners.

Quotes

"Wellingtone provided 4 CVs which fitted our requirements well and we made an offer to one of these candidates"
