

Case Study

Sector: Local Government
Client Requirement: Project Manager (PRINCE2)
Basis: 1 x Permanent Role

The Situation

The client a local authority needed to recruit a Project Manager for the IS department. They Wanted a PRINCE2 Practitioner with a degree in Computer Sciences (or equivalent) and solid experience in delivering full lifecycle projects. Their ideal candidate would also possess expert level skills in MS Project and Office.

Wellingtone were selected with a number of other recruitment agencies (including other project management specialists) to help source for these requirements.

The Wellingtone Process

Understand > Source > Assess > Introduce

The initial step was to understand the exact requirements to ensure we only sent candidates that we were confident the client would want to interview. So we discussed in -depth the responsibilities of the role and the attributes required by the successful candidate should possess.

The discussion allowed us to proceed with a clear understanding through which we were able to source / shortlist candidates from within our own internal database and create targeted adverts to be placed at:

- Wellingtone.co.uk: which has a traffic ranking in the top 7.72% of all websites (Alexa) and receives generally high search engine ranking
- Partner sites: jobs displayed on wellingtone.co.uk are automatically listed on a network of other prominent Project Management websites
- External Job Boards: we have full access to the UK's leading job boards
- Project Manager Today: we have an exclusive partnership and can provide free colour co -branded adverts, saving you £1750

The shortlisted candidates completed a two step assessment process. This consisted of a high level evaluation against the role requirements and then a detailed technical interview with one of the Senior level Wellingtone Project Management Consultants. This enabled us to assess the candidates' project management competencies against the role requirements. The results were used to create the final candidate shortlist for submission.

The Outcome

We introduced 3 high calibre PRINCE2 Project Managers to the client, all were interviewed and 1 was successfully placed on a permanent basis.

The successful candidates had experience in delivering public & private sector IT projects with PRINCE2 Practitioner certification and ITIL Foundation .

Quotes
